Chennai, India | [ponsaranya2004@gmail.com](mailto:ponsaranya2004@gmail.com) | [linkedin.com/in/ponsaranya-r](https://www.linkedin.com/in/ponsaranya-r) | [github.com/Ponsaranya](https://github.com/Ponsaranya) | +91 6374393780

## EDUCATION

### SRM University, Chennai, India

May 2025

B.Tech., Computer Science and Engineering (Specialization: Information Technology) | CGPA: 9.21/10.0

Coursework: Data Structures & Algorithms, Operating Systems, Computer Networks, DBMS, Machine Learning, Linear Algebra, Probability & Statistics

### Ethiraj Matric Higher Sec School, Vellore, India

May 2021

Higher Secondary Education | Percentage: 84/100

## EXPERIENCE

### Standard Chartered Global Business Services - Technology Apprentice - AI | ML

July 2025 – July 2026

- Developed Python-based automation solutions for SI Governance, reducing repetitive manual effort by 70% across documentation, approval, and reporting workflows.
- Analyzed business requirements and operational data to identify process gaps and opportunities for automation, optimization, and improved reporting.
- Applied Python, SQL, REST APIs, and AI/ML concepts to support data processing, workflow automation, and enterprise solutions.

### Flex - IT Trainee

Dec 2023

- Supported IT operations with exposure to data analysis, resource management, process optimization, and workforce management.
- Worked with integrated systems and operational workflows to identify opportunities for automation and data-driven decision-making.

## PROJECTS

### AI-Assisted Automation for SI Governance | Python, BeautifulSoup, Azure DevOps, Confluence, Power Automate

Feb – May 2026

- Built a Python-based automation pipeline to extract, process, and structure governance information from enterprise sources.
- Integrated BeautifulSoup, Azure DevOps, Confluence, and Power Automate to automate content processing, documentation, and workflow coordination.
- Used GitHub Copilot and AI-assisted content generation to improve documentation consistency and streamline repetitive governance activities.

### AI-Powered Banking Chatbot | Python, LLMs, PyTorch, RAG, Prompt Engineering, Streamlit, OCR, SQLite

Dec – Jan 2026

- Built a Generative AI-powered banking assistant using Python, LLMs, and prompt engineering to handle customer queries.
- Implemented OCR and RAG-based document processing with embeddings to extract, retrieve, and analyze information from banking documents.
- Developed a Streamlit application integrating PyTorch-based ML components and SQLite for chat-history management and banking insights.

## CERTIFICATIONS / ACHIEVEMENTS

- Published paper: "Hydrological Classification Using ML Classification Algorithms" in CRC Press (Taylor & Francis Group), 2024.
- Oracle Certified Foundations Associate
- AWS Academy - Cloud Foundation and Cloud Architecting

## TECHNICAL SKILLS

**Programming Languages:** Python, SQL, C++, C

**AI / Machine Learning:** Machine Learning, Data Preprocessing, Feature Engineering, Predictive Modeling, Model Evaluation

**Generative AI:** LLMs, RAG, Prompt Engineering, LangChain, Hugging Face, AI Agents

**Libraries / Frameworks:** NumPy, Pandas, Matplotlib, PyTorch, Streamlit, BeautifulSoup

**Backend / Databases:** REST APIs, SQLite, MySQL

**Tools / Cloud:** Git, GitHub, GitHub Copilot, Jupyter Notebook, Azure DevOps, AWS

**Core CS:** Data Structures & Algorithms, OOP, Operating Systems, Computer Networks
